DETAILED ACTION

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- A. Method of forming a highly crystalline cross-linked polymeric material wherein the polymeric material is heated above the melt temperature, and is irradiated after heating, pressurizing, cooling and releasing.
- B. Method of forming a highly crystalline cross-linked polymeric material wherein the polymeric material is heated below the melt temperature, and is irradiated after heating, pressurizing, cooling and releasing.
- C. Method of forming a highly crystalline cross-linked polymeric material wherein the polymeric material is heated below the melt temperature, and is irradiated before heating, pressurizing, cooling and releasing.
- D. Method of forming a highly crystalline cross-linked polymeric material wherein the polymeric material is heated above the melt temperature, and is irradiated before heating, pressurizing, cooling and releasing.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims

subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

- A. Claims: 1, 3, 7, 8, 11-14, 22-24, 26, 29, 30, 32, 36-39, 60, 62-64, 72, 74, 76, 78, 80-86, 94, 95, 97, 105, 107, 111, and 112.
- B. Claims: 2, 4, 58, 59, 61, 65, 66, 68-71, 73, 75, 77, 79, 95, 97, and 107.
- C. Claims: 87, 91, 93, 101, 103, 109 and 110.
- D. Claims: 90, 92, 101, 103, 109 and 110.

The following claim(s) are generic: Currently, claims 95, 97 and 107 are generic between groups A and B. Claims 103, 109, and 110 are generic between groups C and D. There appear to be no generic claims between all groups.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons. Wherein the special technical feature of the methods of making a highly crystalline cross-linked polymeric material are the methods steps and the order of the method steps, the above species do not share the same special technical feature, as they claim mutually exclusive processes.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
